EDUCATION

New York University

Master of Science in Computer Science

PROGRAM FOCUS: Advanced computer science concepts, data structures, algorithms, and web technologies

COURSEWORK: Principles of Database Systems, Big Data, SWE, DAA, ISP, HCI, AI, [CodePath](#) Advanced Technical Interview Prep

St. Thomas Aquinas College

Bachelor of Science in Computer Science

HONORS & AWARDS: Academic & Athletic Scholarship, Distinguished Dean's List, Chi Alpha Sigma –Nu Chapter, Sigma Zeta

EXTRACURRICULAR ACTIVITIES: Altar Server, Venture, College Soccer, College Track & Field

RELEVANT EXPERIENCE

Lead Coding Instructor

June 2024 – August 2024

Brains & Motion Education

- Led instructor team, providing personalized feedback and implementing gamification strategies to improve teaching performance
- Taught **Python**, **AI** concepts, **algorithms**, and game design to groups of up to 12 students using platforms like Scratch
- Delivered weekly project presentations to parents, showcasing student achievements and providing individualized progress reports
- Facilitated student-centered learning through real-time feedback and hands-on projects

Software Engineer Intern

June 2023 – September 2023

Roadcall.co

- Co-designed and implemented an admin note feature using **React**, **Redux**, and hooks for state and lifecycle management
- Addressed 90% of user concerns by actively testing and creating action items based on survey feedback
- Pushed and reviewed code using **Bitbucket**, ensuring compliance with company standards and best practices
- Ensured accurate data processing by resolving 8 critical formatting bugs using **TypeScript**
- Collaborated cross-functionally within an Agile team, ensuring successful sprint execution

Software Engineer Intern

May 2021 – September 2021

Treehouse Strategy

- Increased client engagement by 20% by developing a dynamic dashboard page for agency partnerships using **React**
- Reduced bugs and improved application maintainability by implementing reusable components with React
- Optimized data visualization and user experience by building responsive data tables with React and **REST API** integration

XLAB Researcher

September 2019 – May 2022

St. Thomas Aquinas College

- Conducted a **VR** study on biases related to race, gender, and weight, and presented findings at the ISTE Convention in New Orleans
- Developed a proximity-based dialogue systems in **Unity** using **C#**, and enhanced the application using a **Mo Cap Suit** for animations
- Led a team of 5, coordinating tasks and meetings in an Agile Scrum environment with sprint planning and stand-ups

PROJECTS

NYU Interview Prep – Full Stack Developer

[GitHub](#)

- Led a team of 5 to build a career web app with **Python**, **Django**, and **React**, designed to connect students pursuing similar careers
- Designed and implemented a coding editor that allowed users to run and compile code, ensuring the code could be retrieved for future sessions using PostgreSQL for data storage and APIs for seamless data retrieval
- Integrated AWS S3 for secure video uploads, enabling users to post mock interview videos and receive feedback from other users

Stack Overflow Post Big Data - Full Stack Developer

[GitHub](#)

- Developed an interactive web dashboard for visualizing insights from StackOverflow's dataset using React and Apache Echarts.
- Processed a 100GB dataset with streaming and batching techniques, optimizing large XML file handling.
- Utilized MongoDB for data storage and AWS DynamoDB for efficient retrieval of precalculated analytics.
- Optimized real-time queries and visualizations by precomputing complex analytics and indexing key fields.

Cleaning Service – Freelance Software Engineer

[View Project](#)

- Developed a booking system with **React**, **GraphQL**, and **Express.js**, allowing users to schedule, confirm, and process payments
- Worked closely with the client to deliver a customized solution that met specific business needs

FatEar - Full Stack Developer

[GitHub](#)

- Developed a dynamic song search feature using Flask and SQL, allowing users to filter songs by genre, artist, and rating.
- Optimized data retrieval by implementing efficient SQL queries with JOINS and subqueries to aggregate song information from multiple tables.

SKILLS

Languages : Java, JavaScript, Python, C#, HTML/CSS, SQL databases (Postgres, MySQL)

Frameworks : React, Next.js, Flask, Django, Node.js, Express, Bootstrap, Hadoop, Spark, MongoDB Atlas, OpenAI

Developer Tools: GitHub, Zenhub, Trello, Bitbucket, CI/CD Pipelines, Unity, Virtual Reality, Figma, AWS

ADDITIONAL EXPERIENCE

St. Thomas Aquinas College – Software Engineer Adjunct Faculty | Spkill, NY

August 2024 – Present
