Education

New York University | Master of Science in Computer Science May 2025

NYU Entrepreneurial Institute's Startup Accelerator Program: Founded COLEAGUE, a CS mentorship platform, leading customer discovery through 33+ interviews and executing strategic pivot to optimize product-market fit.

Degree Focus: Advanced computer science concepts, data structures, algorithms, and web technologies

St. Thomas Aquinas College | Bachelor of Science in Computer Science

May 2022

Technical Experience

Roadcall.co | Software Engineer

June 2023 – Dec 2023

- Co-designed and implemented admin note feature using **React**, **Redux**, and **hooks**, streamlining communication across 20 operations teams and improving customer experience for thousands of truck drivers. Resolved 90% of identified user concerns by actively testing and implementing systematic solutions based on survey feedback.
- Developed carrier portal features including badge count systems, pagination, and load forms using **React** and **Redux**, improving performance for large load lists and ensuring data accuracy for hundreds of daily form submissions.
- Pushed and reviewed code using **Bitbucket**, refactoring existing code and enforcing coding standards to improve application performance and maintainability. Enhanced data reliability, resolving 8 bugs using **TypeScript**, preventing data corruption issues.
- Leadership: Presented & coordinated technical solutions to non-technical stakeholders. Supported sprint delivery by contributing to daily standups and sprint planning, identifying application issues, presenting testing updates.

Treehouse Strategy | Software Engineer

May 2021 – Sep 2021

- Developed dynamic dashboard page for agency partnerships using **React**, increasing client engagement and interaction.
- Implemented reusable **React** components, reducing bugs and improving application maintainability across the platform.
- Built responsive data tables with **React** and **REST API** integration, optimizing data visualization and enhancing user experience.

XLAB (St. Thomas Aquinas College) | Researcher

Sep 2019 – May 2022

- Developed a VR study to help users identify their unconscious biases related to race, gender, and weight. Developed proximity-based dialogue systems in **Unity** using **C#**, and enhanced the application using a **Mo Cap Suit** for animations.
- Presented research findings at the **ISTELive 22 Conference** and **Ignite Exhibition** - selected to deliver keynote speech representing STAC's STEM department at fundraising dinner, sharing our research findings and my personal experience to help secure \$125,000 in STEM scholarships for underrepresented students.
- Leadership: Led a team of 5, coordinating tasks and meetings in an Agile Scrum environment with sprint planning and stand-ups.

Educator Experience

Brains & Motion Summer Camp | Site Director & Instructor

June 2024 – August 2025

- Led product strategy and operations for summer enrichment program serving 160+ students across STEM, arts, and physical activity verticals.
- Coordinated facility operations and stakeholder management, liaising with building managers and external partners to ensure seamless program execution and operational compliance.

St. Thomas Aquinas College | Adjunct Professor

August 2024 – Present

- Deliver technical curriculum across Software Engineering and Cloud Computing courses, adapting content delivery based on student feedback and performance analytics.

Selected Technical Projects

SmartFRQ | Full Stack Developer [[View Project](#)]

Built a focused prototype for APCompTutor.AI, an AI-powered AP Computer Science practice platform that processes PDF questions into structured JSON format, and uses the Feynman Technique for enhanced learning. Used **Next.js**, **TypeScript**, and **multi-model AI integration** to create a user-friendly platform to provide custom prompts and intelligent feedback for students.

NYU Interview Prep | Full Stack Developer [[GitHub](#)]

Led a team of 5 to build a career web app with **Python**, **Django**, **EC2** and **React**, designed to connect students pursuing similar careers. Designed and implemented a coding editor that allowed users to run and compile code, ensuring the code could be retrieved for future sessions using **PostgreSQL** for data storage and APIs for seamless data retrieval. Integrated **AWS S3** for secure video uploads, enabling users to post mock interview videos and receive feedback from other users.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C#, Swift, HTML5, CSS3, SQL

Frontend: React, Next.js, Redux, State Management, Responsive Design, Data Visualization

Backend: Node.js, Express, Django, Flask, RESTful APIs, GraphQL, Microservices

Cloud & Data: AWS (S3, DynamoDB, API Gateway, Lambda, Amplify, EC2, Cognito, CloudWatch), PostgreSQL, MongoDB, Big Data Processing

Tools & Technologies: Docker, Unity, Apache Echarts, Regex, Testing, Performance Optimization
